Thank you for choosing Blessings Ranch for your grass fed beef needs. Our cattle graze on pasture from birth to butcher. They are never fed any growth stimulants, hormone, or grains; nor are they vaccinated or given antibiotics. We do supplement our breeding stock with alfalfa grass in pelleted form to keep our cattle friendly and used to handling to reduce stress. Our cattle are grass fed and grass finished; which we refer to as grass fed from birth to butcher.

Circle One	Portion (approx hanging weight)	Prices per pound of hanging weight*	Approx. total price*	Deposit amount

**Return with deposit to: (Please make checks to Blessings Ranch)**  
**Blessings Ranch, 20000 Bauer Hockley Rd Tomball, TX 77377 (can email also)**

\*The price is based on the hanging weight of the actual animal. Weights are estimated; actual weight will be certified by the butcher prior to aging in cold storage. 7-10 days of aging prior to cutting and wrapping is typical. When the meat is cut and wrapped you will have about 60-70% of the hanging weight in final yield, without bones and other inedible parts. This is the usual and customary way of purchasing beef in bulk.

\*\*Cut sheets and organ choices are only offered on whole beef. On whole beef unwanted organs can be ground into the ground beef or traded for equal value of ground beef from our store.
